

Welcome

Country Hills Egg Farm Neighbour Meeting

Today's session will introduce the proposed expansion project, share information and answer your questions about the application.

September 15, 2026

About Us

Our passion for egg farming began decades ago, here in Alberta, our home.

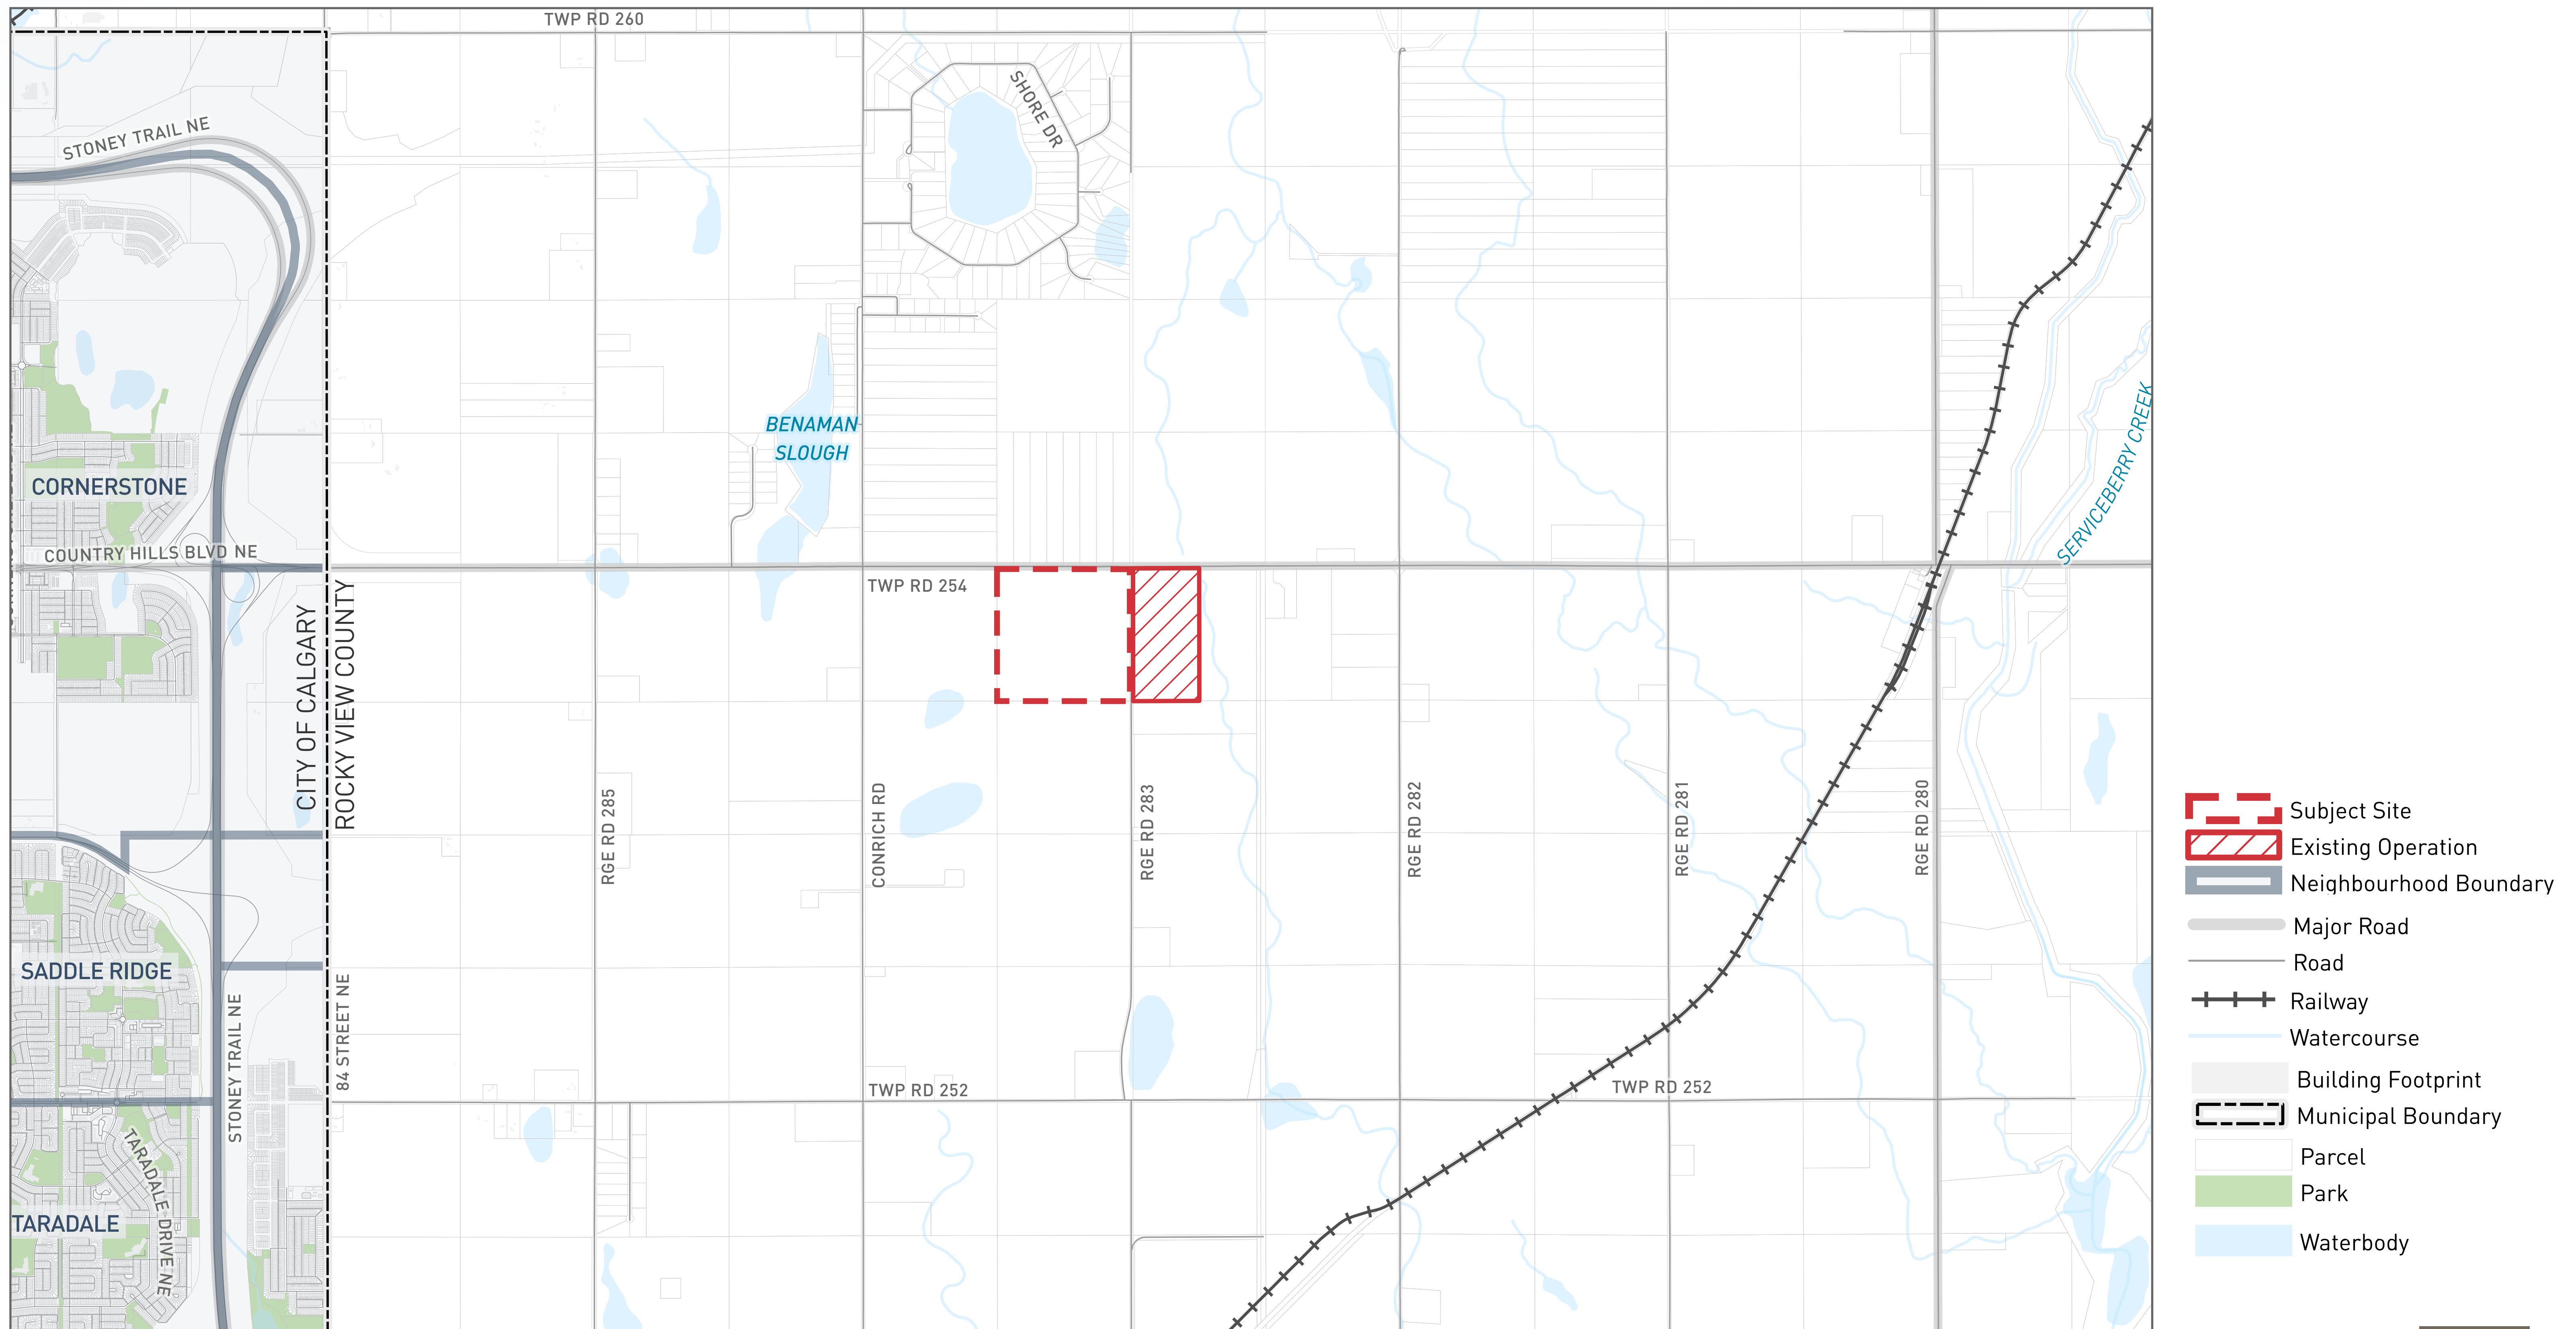

The Gilani family – owners of Country Hills Egg Farm – have been involved in the egg farming business in Alberta since the 1970's when they first purchased a farm with a well-established laying hen operation in the city of Calgary. Since the Gilani's took ownership, the company continuously grew. The Gilani's eventually began expanding into retail, sold all of their eggs and began purchasing eggs from local farmers, and continued to grow their egg grading operations.

The Gilani's former business has since become one of Alberta's leading egg suppliers and produces up to 1.5 million eggs every day. In December 2016, the Gilani's sold their interest in the egg grading business and are now focused on growing their farm, Country Hills Egg Farms.

Proposed Expansion

Country Hills Egg Farm has applied to the Natural Resources Conservation Board (NRCB) to expand its egg-farming operation westward onto NW 22-025-28 W4 and NE 21-025-28 W4.

If approved, the project would include two new layer barns, an egg-packing area and a farm shop, located across Range Road 283 from the existing farm.

The expansion would increase the farm's capacity from 151,200 to 253,700 laying hens. At full production, this would result in approximately two additional trailer loads of eggs per week.

Livestock Category	Current Livestock Permitted	Proposed Increase	Proposed Total	
Laying Hens	151,200	102,500	253,700	
Pullets	63,000	0	63,000
